Executive Summary

I am a final-year Information Technology (Software Development) student at NBCC with a full-stack foundation in C#/.NET, Java, JavaScript, HTML/CSS and SQL. Before moving into software development, I spent more than three years as a Catalog & Digital Tool Project Manager at adidas and earned the Project Management Professional (PMP) certification in 2020.

I combine hands-on development skills with strong requirements-gathering, planning and cross-functional communication. As a trilingual professional (English, Mandarin, Korean), I work comfortably in diverse teams, and I am seeking a software development internship / practicum placement where I can contribute from the first day and keep growing as a developer.

Areas of Expertise

- Full-stack web development (ASP.NET Core MVC)
- C#, .NET, Java and JavaScript
- HTML and CSS front-end development
- SQL and SQL Server database design
- Unit testing with xUnit
- Git and GitHub version control
- Agile / Scrum and Project Management (PMP)
- Requirements: use cases, user stories, wireframes

Languages: English, Mandarin, Korean

2. Summary of Skills

2.1 Background

My path into software development is built on a business and project delivery background:

- **Education:** Diploma in Information Technology: Software Development at NBCC, Moncton (September 2025 – present), following a Bachelor of Arts in Advertising from Changchun University of Science and Technology, China (2009–2013).
- **Domain experience:** Catalog & Digital Tool Project Manager at adidas (January 2022 – June 2025), working in retail and trade marketing. I produced trade marketing catalogs, coordinated with Business Units to keep product release data accurate, and maintained digital tools used by the team.
- **Project management:** PMP certified since December 2020, with experience in requirements definition, accountability for deadlines and cross-functional rollouts.

2.2 Software Development Skills

Category	Skills and Tools
Programming Languages	C#, Java, JavaScript, SQL, Bash scripting
Web Development	HTML, CSS, .NET, ASP.NET Core MVC
Databases	SQL Server, relational database schema design
Testing and Version Control	xUnit unit testing, Git, GitHub
Development Environment	Visual Studio, VS Code, Ubuntu and WSL
Design and Analysis	UML class diagrams, use cases, user stories, wireframes
Methodologies	Agile / Scrum, Project Management (PMP)

2.3 Areas of Specialization and Contribution

My specialization is building web applications with the Microsoft stack (C#, .NET, ASP.NET Core MVC, SQL Server) while bringing a project manager's discipline to every stage of delivery. On a team I can contribute in the following ways:

- **Full-stack delivery:** implementing features across the front end, back end and database, and covering them with xUnit tests.
- **Requirements and communication:** turning business needs into use cases, user stories and wireframes, and acting as a bridge between technical and non-technical stakeholders.
- **Reliable execution and collaboration:** planning work, tracking progress and delivering on schedule in Agile / Scrum teams, using Git and GitHub, and communicating in English, Mandarin and Korean.

3. Overview of Projects

The following projects show how I apply my technical skills and project management experience in academic and professional settings.

Project 1: LinkNest Real Estate Website

Project Name	LinkNest Real Estate Website (Server-Side Web: MVC course project, 2026)
Project Domain	Real estate / business web application
Description	A two-person team is building a real estate website with ASP.NET Core MVC for a client. The site supports customer registration, separate customer / staff / admin logins, property browsing, showing bookings, staff image upload and admin creation of staff accounts, with desktop and phone layouts. Each page is designed to fit on one screen, using the LinkNest yellow and dark grey branding.
Tools Used	ASP.NET Core MVC, C#, .NET, Visual Studio, Git and GitHub, UML / wireframing
Outcomes	In progress. Completed so far: team profile memo (team information, client company, logo concept and catch phrase), use cases and user stories, the final home page design (desktop and iPhone) with the tagline “Linking millions to a place called HOME.”, and the final Upload Image page design for desktop and phone (see Section 4).

Project 2: Mini Rogue Console Game

Project Name	Mini Rogue Console Game (Academic Project)
Project Domain	Software development / games
Description	A team project to design and develop a console-based rogue-like game, planned with UML class diagrams. I implemented core game logic using object-oriented principles.
Tools Used	C#, .NET, Git, UML class diagrams
Outcomes	Delivered a playable application on schedule.

Project 3: Catalog and Digital Tool Management at adidas

Project Name	Trade Marketing Catalogs and Digital Tools (Professional Experience, 2022 – 2025)
Project Domain	Retail / sporting goods, trade marketing
Description	Created trade marketing catalogs and coordinated with Business Units to update product release data. Maintained the digital tools used by the team and resolved execution issues during cross-functional project rollouts.
Tools Used	Internal digital tools, project management methods (PMP framework), cross-functional coordination
Outcomes	Improved data accessibility and operational efficiency for the team, and met project timelines across rollouts.

4. Samples of Related Work

The samples below come from the LinkNest Real Estate Website course project (Server-Side Web: MVC). They are academic work and contain no confidential client or employer information.

4.1 Use Case Diagram

The use case diagram shows the three user roles (Customer, Staff, Admin) and the main functions of the website.

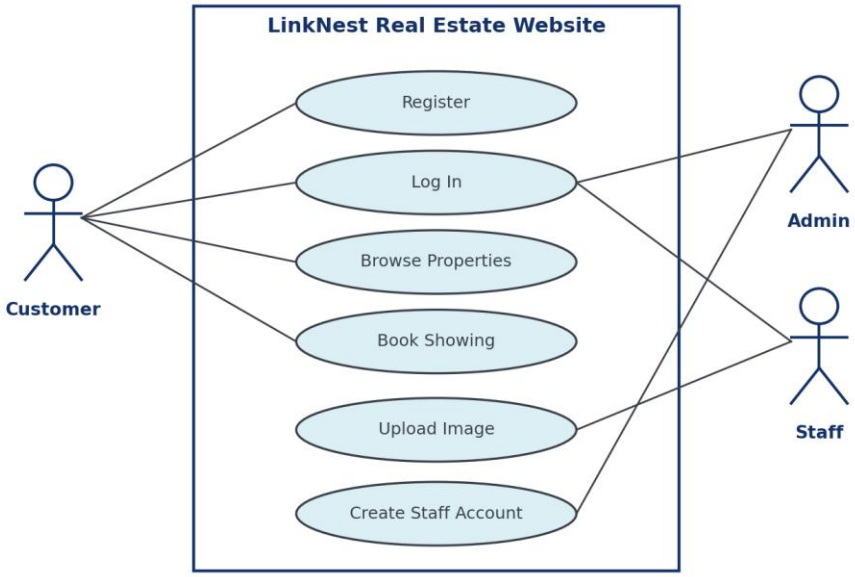

Figure 1. Use case diagram for the LinkNest website

4.2 Use Case Narrative

Use Case	Upload Image
Actor	Staff
Precondition	The staff member is logged in through the staff login.
Main Flow	1. The staff member selects Upload Image. 2. The system displays the Upload Image page. 3. The staff member chooses an image file, adds a description and selects Upload. 4. The system checks the file. 5. The system saves the image and shows a confirmation message.
Alternative Flow	If the file is not valid, the system shows an error message and the staff member can choose another file.
Postcondition	The image is saved and available in the system.

4.3 User Stories

ID	As a…	I want to…	So that…
US-01	Customer	register an account	I can book showings
US-02	Customer	log in to the website	I can access my account
US-03	Customer	browse available properties	I can find homes that interest me
US-04	Customer	book a showing for a property	I can view it in person
US-05	Staff member	log in through the staff login	I can use the staff tools
US-06	Staff member	upload an image	images are available on the website
US-07	Admin	create staff accounts	staff can access the staff tools
US-08	Visitor	use the website on my phone	I can use it anywhere

4.4 User Interface Designs

The final home page design, shown for desktop and iPhone, follows the LinkNest yellow and dark grey branding and fits on one screen per layout. The final Upload Image page design (desktop and phone) uses the same layout and branding.

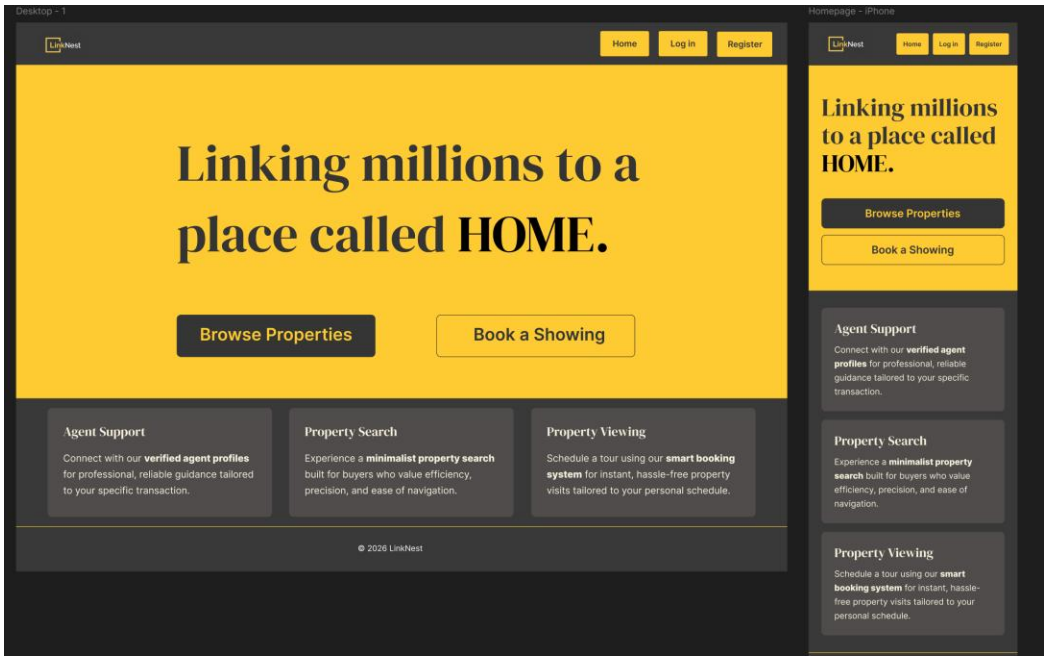

Figure 2. Final LinkNest home page design: desktop (left) and iPhone (right)

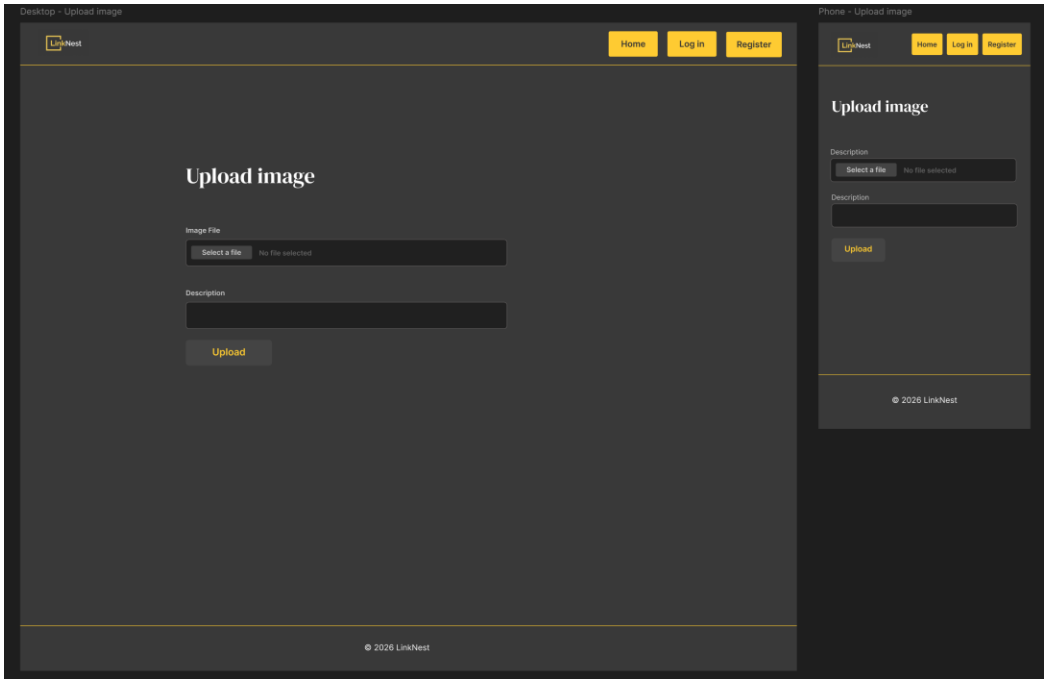

Figure 3. Final LinkNest Upload Image page design: desktop (left) and phone (right)

4.5 Functional Requirements

ID	Requirement
FR-01	The system shall allow customers to register an account.
FR-02	The system shall provide separate login pages for customers, staff and admins.
FR-03	The system shall allow users to browse properties.
FR-04	The system shall allow customers to book a showing.
FR-05	The system shall allow staff to upload an image with a description, check the file and confirm the result.
FR-06	The system shall allow an admin to create staff accounts.
FR-07	Each page shall fit on one screen and have a phone version.
FR-08	All pages shall follow the LinkNest branding (yellow and dark grey).

5. Accomplishments

The achievements below reflect my growth from project management into software development.

- **PMP certification:** earned the globally recognized Project Management Professional credential from the Project Management Institute (granted December 2020).
- **Professional impact at adidas:** over three years of managing catalogs and digital tools. Maintaining these tools improved data accessibility and operational efficiency, and I met timelines during cross-functional rollouts.
- **On-time team delivery:** collaborated on the Mini Rogue console game and delivered a playable application on schedule.
- **Career transition into software development:** building a full-stack foundation in C#/.NET, Java, JavaScript and SQL, and currently applying ASP.NET Core MVC in a client-based team project.
- **Quality practices:** using xUnit for unit testing and Git / GitHub for version control in my projects.
- **Community involvement:** volunteered at the Legs for Literacy event in Moncton (October 2025).
- **Multilingual communication:** fluent in English, Mandarin and Korean, which supports collaboration in international and diverse teams.

6. Professional Development

Certifications

Certification	Project Management Professional (PMP)®
Issuer	Project Management Institute (PMI)
Original Grant Date	05 December 2020
Expiration Date	05 December 2026

Figure 4. PMP certificate

Formal Education

- **Diploma in Information Technology: Software Development,** NBCC, Moncton (September 2025 – present): applying programming principles to practical software engineering projects and hands-on labs.

Volunteer Initiatives

- **Legs for Literacy, Moncton, New Brunswick (October 2025):** directed runners, maintained course safety and demonstrated teamwork at a fast-paced community event.

7. Testimonials and Recommendations

Feedback from my time at adidas:

> *"Working with Xuanzhe at adidas was a great experience. He brought a high level of professionalism and responsibility to our team. He has a great talent for keeping cross-functional projects moving smoothly and is very agile when it comes to solving problems on the spot. Any team would be lucky to have him."*
>
